

Dermasin

Veterinary preparation

CLEVER FUNGUS

EN

Product suitable for use on delicate skin prone to eczema and dryness. Utilises mycoparasitism to destroy the filamentous micromycetes and fungus on the skin, coat and other areas. Dermasin Oil is suitable for combining with veterinary product Clever Fungus Ecosin.

- Suitable for local fungi and yeast infections
- Suitable for atopic skin treatment
- Suitable treatment for skin allergies
- Suitable treatment for sensitive, dry, chapped skin

Instructions for use:

1. Bath:

Shake the bottle thoroughly before use.

Add 1 teaspoon of oil to 1 litre of lukewarm water (about 34°C) and stir.

After the bath, allow the skin/coat to dry naturally.

Repeat as required.

2. Skin Application:

Shake the bottle thoroughly before use.

Moisten the affected areas of the skin/coat with lukewarm water (about 34°C).

Rub the oil in gently to the affected areas.

After 10 minutes remove any excess oil gently i.e. with soft paper towels, if necessary.

Apply to affected areas as required.

Do not use any other antifungal treatments in conjunction with Dermasin.

Storage: Store product in dry conditions at room temperature (15 to 25 °C). Do not allow product to come in contact with any other products/chemicals/equipment. Package disposal as per local regulations.

Warning: Keep out of reach of children. Veterinary product only. Not for oral use.
